

COUNT ME BASIC

THE DIGITAL CUSTOMER-COUNTER

Exceptional times require exceptional actions. To face the increasingly strict standards with regards to social distancing and access control we quickly used our existing materials to create a competitive product, which will be a useful tool to help retail in order to cope with the daily flow of customers.

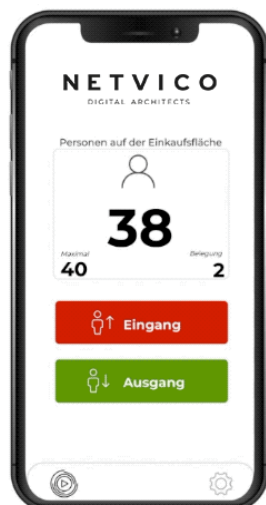

1. THE STELE.

Our product, consisting of two steles and an app, controls the entry access with an easy to understand traffic-light system: fully automatic, simple and at a very competitive price. Equipped with our proven stentering frame, programmed LED-Stripes, an infrared sensor and in combination with a simple but effective software, our stele takes over the counting of the customer at the entry and exit. Simply plug in and get started.

2. THE SUSTAINABLE USAGE.

CountMe is not only the right choice in times of a crisis; it will continue to be an effective tool afterwards for customer or employee information, or as advertising rostrum. Through the usage of our standard products the content can be exchanged easily and at a great value.

3. THE APP.

Through the CountMe app, which is included in the package, our customers have a valuable monitoring tool which guarantees a continuous overview of the current customer capacity in the shop. Furthermore, the control via the app allows an immediate and uncomplicated response to react to new government measurements.

customer counting made simple
